

Subject: Request for Waiver of Subrogation Without Additional Premium – MAPA Safety Foundation

To Whom It May Concern,

I am writing on behalf of the **MAPA Safety Foundation**, a non-profit aviation safety and proficiency training organization dedicated to improving pilot skill, judgment, and operational safety within general aviation, with a particular focus on the Mooney aircraft community.

We respectfully request that insurers grant a **Waiver of Subrogation in favor of the MAPA Safety Foundation without additional premium charge** for policyholders participating in our sanctioned training events and proficiency programs.

The MAPA Safety Foundation is not a commercial flight operation, aircraft rental provider, or charter organization. Our sole mission is aviation safety. Our programs are designed to **reduce risk**, not increase it. In fact, participation in MAPA Safety Foundation activities demonstrably lowers exposure by improving pilot competency, decision-making, and adherence to best practices.

Our instructional staff represents some of the most experienced aviators in general aviation:

- I personally bring **over 10,000 total flight hours**, including **more than 8,500 hours in Mooney aircraft**
- Our staff includes a **Designated Pilot Examiner** with **over 18,000 flight hours**
- All instructors are seasoned professionals with extensive operational and instructional backgrounds

Beyond individual experience, the Foundation delivers structured, safety-focused programming, including:

- Comprehensive proficiency training programs for pilots of all experience levels
- Safety seminars emphasizing aeronautical decision-making, emergency preparedness, and risk management
- Workshops focused on improving real-world piloting skills and operational discipline
- Education on aircraft maintenance awareness and best practices
- Development of new training resources and educational materials for the Mooney community

These programs are specifically engineered to **enhance pilot performance, reduce incident rates, and promote safer operations**, outcomes that directly align with the underwriting goals of aviation insurers.

Granting a waiver of subrogation for participation in MAPA Safety Foundation events does not increase insurer exposure; rather, it supports an organization that actively **mitigates loss potential** through education and proficiency. Many insurers already recognize that recurrent training and structured safety programs correlate strongly with reduced claims activity.

Your support enables us to continue offering these vital safety programs, helping pilots fly safer and more confidently. Together, we are building a stronger, safer future for general aviation.

If additional information or documentation is required, we would be pleased to provide it.

Thank you for your consideration and continued support of aviation safety.

Respectfully,

Robert McGuire

MAPA Safety Foundation
